

# Botanical Garden IVN Elsloo

## The Netherlands

The botanical garden IVN Elsloo is located in the beautiful province of Limburg in the south of The Netherlands, a 15 minutes drive from Maastricht. Located next to

the Castle of Elsloo in the village of Elsloo, it is situated in a peaceful and green area, and offers theme areas as well as a great variety of extraordinary plants, some of them endangered. Our aim is the protection of this environment and the education of the public.

We underwent a major renovation in 2020 to make our pathways accessible to wheelchairs. We had hoped to reopen the garden this year but Corona decided

otherwise... We hope to be able to welcome visitors next May 2021!

Interested in ordering seeds from our collection? Please follow the procedure outlined hereafter and be aware that:

- Seed samples will be limited to a maximum of 10
- Requests will be honored on a first arrival basis until supplies are exhausted
- Mention the family and species name as well as their catalogue number

Send your request per email before 31.03.2021 not forgetting your address!
