

### Urban heat island

One healthy tree in the city has the same cooling capacity as 10 airconditioners.

A Tiny Forest is at least **200** square meters.

There are **600 trees** of 36 different species in a Tiny Forest of 200m<sup>2</sup>.

### Air purification

One city tree can absorb the carbon and particular dust emission of 10.000 car kilometres.

### Water storage

One adult tree can store up to 8.000 liters of rainwater.

### Nature = healthy

People feel healthier and pay less visits to the doctor in a green environment.
